

PROFESSIONAL PRODUCT PRESENTATION

HYDRAULIC PERIPHERALS (HYM) TESTING JIG

A precision-engineered testing solution designed for PCB functional testing and hydraulic interface validation. Built for accuracy, reliability, and long life in industrial environments.

APPLICATIONS

- PCB functional testing
- Hydraulic interface validation
- Production testing
- R&D and development

KEY FEATURES

- Precision test fixture
- Robust mechanical frame
- Multi-switch control panel
- Industrial grade construction
- Reliable repeatability

BENEFITS

- High accuracy
- Faster testing
- Improved quality
- Reduced manual errors
- Enhanced productivity

BUILT FOR RELIABILITY

Engineered with high-quality components to deliver consistent performance in demanding industrial environments.

HIGH ACCURACY

FASTER TESTING

IMPROVED QUALITY

REDUCED
MANUAL ERRORS
