

To start FCT/ICT Test Fixture project, following information shall be answered:

Customer: _____

Project Name: _____

1.We need 1 assembled and 1 empty PCB.

2.Gerber data

3.CAD data (e.g. ODB++)

4.Test points list with X, Y coordinates.

5.Test point numbers.

5.1: Bottom 100 mil: _____ No's

5.2: Bottom 75 mil: _____ No's

5.3 Bottom 50 mil: _____ No's

5.4: Top 100 mil: _____ No's

5.5: Top 75 mil: _____ No's

5.6: Top 50 mil: _____ No's

6.Wiring list – if wiring needed.

Wiring needed? YESNO

If yes Details need to share.

7.Interface type of definition

7.1 Tester type:

8.Cable type

8.1 AWG 26_____ AWG 30_____ Others _____ Both _____

9.Fixture type

9.1 Fixture Type

Vacuum

Pneumatic

Manul

RF

Fixture type if manual!

Low-CostStandard

Interface PanelYes / No

Interface Blocks170 Pin Signal

High Current

RF

Optical

Vacuum

Pneumatic

Connectorseg: USB, RJ 45, HDMI etc.

10.Extras

Counter

Scanner

Switch Probes

Part Present Sensors

11.Orientation of PCB

Need to be defined by customer.

12.If PCB is multi-panel, please define with panel gerber and image.

13.If there is a connector, which must be tested? (which side to contacted)

Top

Bottom

Side

14.If there is a connector, how to connect:

Manually with Fixture

Pneumatic

15.If the fixture is in-line, send pictures, how is the fixture placed on handler

16.Vacuum pressure at customer _____ bar.
